Kiba Inu
Kiba Inu is an anime-centered meme ecosystem that has a mission to restore integrity to the meme space by building an infrastructure for safe investing and trading. The primary components of the ecosystem include:

1. Kibaswap
2. An NFT marketplace
3. Gamefi integration
4. Anime ecosystem
5. Partnerships

We will be combining the respective components together so that your tokens you hold, the NFTs you own and the other components yet to be revealed can be used symbiotically in P2E / Gamefi and Defi applications with ever evolving utility.
$KIBA is inspired by Kiba Inuzuka, one of the main supporting characters of the Naruto anime/manga series. He always has his trusted canine companion, Akamaru, by his side.

Kiba Inuzuka is loyal to his comrades and will do anything to protect them. This is the energy the $KIBA token aims to embody – a strong, supportive community that wants to grow together.

Join the telegram and come be a part of this moon mission. The $KIBA team continues to show their dedication to the project and prove themselves, consistently showing up and taking action.
KibaSwap is a cryptocurrency exchange that allows to swap ETH in an easy way.

**Vision & Token Utility**

**Comic NFTs**  
KIBA NFTs all saga will be minted & would be tradeable

**KibaSwap**

**Anime Ecosystem**  
Best Anime Ecosystem to benefit all the KIBA fans and to carry out project development & sustain for long period

**GameFi System**  
Play and earn NFTs / $KIBA coins
The most important factor when launching a project is trust. With it comes full transparency of the project and effort to fulfill the vision of the whitepaper. Kiba Inu will be audited by Certik, initial token supply has been burned and Liquidity has been locked. There is no possibility of a rugpull.

We are in for the long-term. With the adoption of Kiba Inu and the community engagement, we will make sure we keep increasing engagement over the coming months in order to drive real use cases, NFT promotion and scale greater rewards for investors.

Last but not least, our most important pillar is our community, which is one of the largest and fastest growing since the generation of meme tokens. With a strong usecase for NFTs and the Kiba Inu genre, we are enabling multiple dimensions combined into one token. A token for the community, dedication and fun!

Kiba Inu endorses full transparency on all transactions and actions it will take to launch the token, fair price building on NFT auctions as well as holders and token price. We empower open communication to the community and our stakeholders to guarantee the long term success of our project.
